

The Total Economic Impact™ Of Microsoft Cloud App Security

FORRESTER®

Through four customer interviews and data aggregation, Forrester concluded that Microsoft Cloud App Security has the following three-year financial impact.

KEY CUSTOMER RESULTS

Cloud App Security reduces the amount of time and effort required to remediate incidents by **80%**.

Cloud App Security automatically eliminates **75%** of threats with automated processes like policy setting.

With Cloud App Security, organizations reduce the likelihood of a data breach by **40%**.

VOICE OF THE CUSTOMER

"Everything prior to MCAS was very much reactive. We'd see these big phishing attacks, but we'd only see it after the fact. We wouldn't have any type of alerting. To understand what happened, we'd have to go and look at logs manually. A lot of times, there'd be all these different panes of glass. So, consolidating that visibility into MCAS was obviously huge for our organization."

Cloud operations lead, university and healthcare

"We discovered close to 9,000 applications that people are accessing, and we want to shut down close to 1,600 applications."

Technical manager, medical device manufacturer

*NPV - Net Present Value. The current value of net cash flows given the Forrester standard 10% discount rate.
